DESCRIPTION	<p>The School Enrichment Program (SEP) at Chaplin Elementary School is based upon The Enrichment Triad Model (Renzulli, 1977) and The Schoowide Enrichment Model (Renzulli & Reis, 1985). Identified students, as well as the general student population, participate in and benefit from a wide variety of program services and activities.</p> <p>Students at Chaplin Elementary School receive three types of enrichment, which we will refer to as Type I, II, and Type III activities.</p> <p>Type I Enrichment experiences are designed to expose students to a wide variety of fields of study, visual and performing arts, topics, places, and events that may not ordinarily be offered in the regular curriculum. These general exploratory experiences are delivered through a variety of means which may include, but need not be limited to: guest speakers, assembly programs, learning centers, mini-courses, video and television programs, and print resources.</p>

DESCRIPTION

Continued from page 1 of 4

Type II Enrichment includes instructional methods and materials that are designed to promote the development of the thinking processes. These process training experiences allow learners to develop their skills in critical and creative thinking as well as problem-solving. As a result of Type II Enrichment, students develop a wide range of learning how-to-learn skills such as note-taking, interviewing, classifying and analyzing data, drawing conclusions, and evaluation. Students develop skills necessary to use advanced reference materials.

Type III Enrichment involves the investigation of real-world problems in which the learner assumes the role of a first-hand inquirer. Students pursuing a Type III Investigation act as practicing professionals in their given field of inquiry. Type III Enrichment provides an opportunity for students to apply their knowledge, interests, creativity, and task commitment in a particular area of study. Students in Type III Enrichment develop authentic products that are designed for a specific audience.

DESCRIPTION	Scotland is a small, rural community located in northeastern Connecticut. Identification of gifted students is based on demonstrated abilities and behaviors and teacher/parent recommendations. Program focus is to provide vertical and horizontal enrichment for above-average students. Services include whole class enrichment, small group work, individualized study, acceleration, and teacher consultation.
